a sub-fund of 1618 Investment Funds

Management Company: Conventum Asset Management

Objectives and investment policy

Objectives

The objective of the sub-fund is to achieve capital growth and generate income by investing mainly in bond and money market instruments. At least 50% of its assets will be invested in issues denominated in EUR.

Investment policy

The sub-fund invests mainly in bonds (traditional and non-traditional), funds, bond indices, certificates, ETFs and derivatives. At least 50% of its assets will be invested in instruments with an investment grade rating. Investments in emerging countries shall not be excluded.

Derivatives are used with the aim of ensuring good portfolio management as well

as for hedging purposes.

The investment currencies are not necessarily identical to the reference currency of the sub-fund. The resulting monetary exposure will not be systematically hedged but will be actively managed by the Manager.

The sub-fund is actively managed in a rigorous risk monitoring environment.

The portfolio is managed on a discretionary basis without using a reference benchmark.

The share class price is calculated every week. The investor may obtain on simple request a redemption with a weekly frequency.

The share class does not distribute dividends.

Risk and reward profile

What does this synthetic indicator mean?

- The shares of class EUR are classified in category 3 because the value of the share may be subject to medium variations and consequently the risk of loss and the opportunity of gain may be moderate.
- The risk category has been determined on the basis of historical data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the sub-fund may shift over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

- **Credit risk:** given the investment approach, the sub-fund is exposed to credit risk. This risk is higher for rated bonds or bonds whose issuer has a Standard & Poor's rating of below BBB- (or an equivalent rating from another rating agency), as well as for non-rated bonds.
- **Liquidity risk:** the sub-fund may encounter difficulties in evaluating and/or trading some of its assets when market conditions are unusual or when a market is characterised by particularly low trading volumes, particularly in response to large redemption requests.
- **Operational risk:** the sub-fund is exposed to a significant risk of loss as a result of human error, system failures or an incorrect valuation of underlying securities.
- **Counterparty risk:** the sub-fund may be subject to losses if a counterparty fails to meet its contractual obligations, in particular for transactions involving derivative instruments on over-the-counter markets.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment in the sub-fund is indicated in the corresponding section of the prospectus of the fund which is available at the Management Company and on the website www.1618am.com.
